# Logipad EFB Solution Optimizes the Paperwork in Your Cockpit with Single-Sync Process and eBriefing

## Logipad is Simple and Smart

Logipad is an Electronic Flight Bag (EFB) solution to make flight management simple, fast and smart for pilots, crew and ground members.
No matter what kind of device you prefer, Logipad guarantees flexible and scalable information handling on ground as well as in the air on mobile and mounted devices.

Role-based management helps you to ensure the provision of all relevant data to the right user group.
Weather, forms, charts or manuals, Logipad replaces paper-based information and keeps it up to date.

The ground process, which deploys all sent data to connected devices, is standardized and matches requirements postulated by FAA and EASA in the respective AC120-76B and NPA 2012-02 (former TGL-36) documentation.

## Key Benefits of Logipad

+ **On Premises or from the Cloud**
  Logipad enables small, medium-sized and even large airlines a safe and secure EFB solution. Based on company policies and existing IT-Infrastructure customers can choose between an On Premise or a Cloud hosted solution.

+ **Multi-Tenancy-Architecture**
  Separate data and administration tasks for different departments e.g. flight operation, maintenance, cabin crew.

+ **Process Optimization through Digital Transformation**
  Digital transformation is more than document dematerialization; it's a matter of cutting away layers, doing better and faster, reducing overall costs to accelerate the business.

+ **Matches Requirements Postulated by FAA and EASA**
  Secures business processes and helps to get them certified by aviation authorities. Digital transformation helps you to optimize your existing business processes.

+ **Establishes Standard Technologies**
  Allowing seamless integration with existing IT-Systems.

+ **Single Synchronization Process**
  One action for being up to date with all-assigned content.

+ **Combines Highly Experienced Knowledge of IT and EFB**

# Logipad is More Than Just an EFB

## EFB and IT Consulting

EFB is more than just a device. It also contains a high-available IT infrastructure and well-defined IT processes for reliable and secure data transactions.

For more than 20 years, we are realizing IT projects for medium-sized enterprises and large corporations in Germany and abroad.

Preparing your environment for an EFB is a complex job, but we can help you with our experience in IT infrastructure services. Our agile project management approach facilitates working with your IT department and pilots in an inter-disciplinary way to improve working processes and communication between all involved stakeholders.

As an IT service and solution expert we can advise you in any other IT related issues and help you with solving your IT challenges. We will find the best solution for your company to get your IT infrastructure ready and keep it stable for a reliable EFB experience.

## Features

✓ **eBriefing/EFF** (ARINC 633 Standard):
With Flight Plan (OFP; FlightLog), Weather Information, NOTAMS (Airport, Enroute, Critical ETOPS), Weather Charts, and additional flight information.

✓ **Documentation**
Document-Reader for different document types like: PDF, HTML, XML, HTML-ZIP, BOEING EDB, EXCEL, WORD, POWERPOINT. Confirmation, Version and Revision handling.

✓ **eForms**
Create your own eForms or use existing Templates. For example, Captains Voyager Report, Occurrence Report, Flight Log, etc.

✓ **Full Text Search (FTS)**
Search the entire library using Logipad's powerful search engine.

✓ **Compliance Reports**
Build your own reports of synchronized content.

✓ **Role-Based Management**
Ensures that users get relevant content only.

✓ **Release Management**
Logipad uses a staging model for releasing content. Before releasing content to the productive stage, a testing stage ensures the correctness of provided content.

## Your Path to Logipad

From our vast experience we know that there is a wide range of different requirements to an EFB solution, and that these demands are very much customer-specific. Moreover, the functions and applications of Logipad are quite comprehensive.

We would therefore be pleased to get you started in a joint workshop in which we introduce Logipad, develop a solution concept, and build a detailed project scope.

## Detailed Information
